

Name: Vishrut Girish Bhake

Phone No: +91-8857861972

E-mail : vishrutbhake11@gmail.com

Objective

Full Stack Developer with Angular Specialist having 3 years of hands-on experience in building dynamic web applications using Angular and Python. Adept at designing scalable front-end architectures and backend solutions, I aim to contribute to cutting-edge projects, leveraging my technical skills to solve complex problems and deliver high-quality products. Seeking to further enhance my skills in a challenging environment that encourages continuous growth.

Summary

- Having with 3 years of experience in designing and developing enterprise applications and products using angular and python
- Worked with agile methodologies
- AWS certified cloud practitioner developer
- Worked on databased like MS-SQL and PostgreSQL
- Knowledge of software configuration tools like GitLab, Jira
- Good understanding of software development life cycle (SDLC) process in real time of analysis, design, implementation, and testing of software applications using angular and python
- Explore domain like energy management
- Knowledge in cloud technology like aws,pythonanywhere

Technical Skills

Technologies:	Angular, Python
Framework:	Angular, Django, Fast Api
Web Technologies	TypeScript, JavaScript, HTML5, CSS3, Bootstrap 5, Material UI, RxJs, HighCharts, Rest Ful APIs,
Database	MySQL, PostgreSQL
Cloud Technology	AWS
IDE	Visual Studio Code, Python IDE
Web/Application Server	Apache Tomcat
Tools	Gitlab, Jira, Putty, WinSCP, CyberArc

Experience

- Working as software developer in Tata Consultancy Services (TCS) since of July 2022

Projects

Projects 1: Enterprise Energy and Emission Management System

Description: An Enterprise Energy and Emission Management Solution is designed to help organizations manage and optimize their Energy consumption, reduce their carbon footprint, and achieve carbon natural goals by reducing emission. Tracks and monitors energy usage across various facilities and operations in real-time. Provides detailed reports and analytics on energy use. Integrates with various data sources such as smart meters, IoT devices, and external databases. Provides recommendations for energy-saving measures and emission reduction strategies. Notifies users of critical issues that require immediate attention.

Role and Responsibilities

- Utilized Python, Django, Angular etc. to design enterprise level applications and client interfaces.
- Implemented single sign-on (SSO) authentication for clients, ensuring secure and efficient access management.
- Integrated data encryption and decryption using crypto js in angular to ensure secure data transmission and storage
- Worked on angular lifecycle hooks, components, templets, directive, pipe, services, interceptor, injectors, event-emitter, rxjs operators and etc.
- Worked extensively with python components such as lists, tuples, sets, dictionaries, decorators, hash map, class-based views and function-based views.
- Worked on Django models, views, urls and handling complex query parameters to efficiently manage and retrieve data.
- Optimized database queries using orm and ms-sql.
- Developed and tested restful api using python and postman and swagger.
- Leveraged git to optimized code versioning and ensure seamless project collaboration.
- Implemented object- oriented programming principles and techniques for the development and maintenance of software applications.
- Collaborated with other developers to handle complicated issues related with deployment of django and angular based applications.
- Responsible for working to define project plans and timescales in an agile environment, with the help of our product manager.
- Participated in client meetings to gather requirements and provide project updates and documented system requirements.
- Managed project dependencies and optimized workflows using npm for efficient package management
- Worked on node.js applications to improve functionality and reduce latency

Projects 2: Hybrid Office and Industrial Plant Energy Control Solutions

Description: Developed and implemented a hybrid management system for a corporate office and plants, optimizing energy consumption through real-time monitoring and automated controls. Leveraged IoT sensors and data analytics to track usage patterns, reduce energy waste, and improve operational efficiency, resulting in cost savings and sustainable energy practices

Role and Responsibilities

- Enhanced and managed scalable web applications using Angular 15, with a strong focus on performance optimization across multiple projects.
- Handled complex development scenarios, including bug fixing, and seamless integration of third-party services.
- Implemented user authentication and profile management using JWT for secure login and registration.
- Worked closely with UX/UI designers to develop intuitive, visually engaging interfaces.
- Revamped data exchange between frontend and backend systems by integrating RESTful APIs.
- Collaborated with internal teams to convert end user feedback into meaningful and improved solutions.
- Integrated High charts for dynamic and interactive data visualization within the application.

Education

Degree	Institute	Board/University	Year of passing	Percentage
BE (Electronics and Telecommunication)	G.H Rasoni College Of Engineering Nagpur	An Autonomous Institute Affiliated To RTMNU Nagpur	2022	80.3%
HSC	Yashwantrao Shinde Junior College Bhadravati	State Board of Maharashtra	2018	73.38%
SSC	Sanskar Bharati Public School Worora	Central Board of Secondary Education Delhi	2016	74.1%

Personal Details

- ☐ Full Name: Vishrut Girish Bhake.
- ☐ Current Address: Anandwan Square Near St.Anne’s Public School, Warora.
- ☐ Date of Birth: 11 February 1999.
- ☐ Nationality: Indian
- ☐ Languages Known: English, Hindi and Marathi.

Declaration

- I Hereby declare that all information furnished above are correct and accurate to my knowledge
